

Your Health This Summer

Beat The Heat

Temperatures during the summer in B.C. can sometimes exceed 30°C. Learn how you can [beat the heat](#) and stay cool during the warm weather.

We all want to make the most of the beautiful B.C. summers, while staying safe.

If your summer plans include travel within B.C., remember that COVID-19 is still present in all areas of B.C. Check the health and safety measures of the communities you travel to.

Please see our [Coronavirus disease \(COVID-19\)](#) health feature for more information.

If you are spending more time outdoors, you may increase your risk of getting injured. You could be exposed to bugs and heat. [Wildfires](#) may expose you to smoke.

To help you enjoy the summer months, see the information below on taking care of yourself and your family.

Featured Topics

Food Safety

Most food borne illnesses are preventable. Learn how to safely prepare and store your food for summer barbeque, picnic and camping meals. Click on the links below for more information.

Swimming and Water Safety

Taking a dip in a pool, lake, river or the ocean is a fun and enjoyable way to beat the summer heat. Before you head to the water, remember to check our [Public Health Alerts In Your Area page](#) for your local health authority pool, lake, river or beach advisories. For information to help you and your family stay safe in and around the water this summer, click on the links below.

Wildfires

Wildfire season is now underway. Every year in British Columbia there are hundreds or thousands of wildfires (also called forest fires), which can affect your health and safety. Exposure to air pollution can irritate your lungs, which causes inflammation and can alter your immune response. This can make it more difficult to fight respiratory infections such as COVID-19.
